Treatment Overview

Cycle number	2	Treatment Start Date	31-07-2023
Number of eggs collected/thawed	8	Day of embryo transfer	05-08-2023
Eggs inseminated (IVF)	Fertilized (2PN) 0	<input type="checkbox"/> IVF	<input checked="" type="checkbox"/> Assisted hatching
Eggs injected (ICSI) 6	Fertilized (2PN) 5	<input checked="" type="checkbox"/> ICSI	<input checked="" type="checkbox"/> PGT
Number of biopsied embryo (PGT)	4	<input type="checkbox"/> Split IVF / ICSI	<input type="checkbox"/> Freeze all
Number of cryopreserved embryos	2	<input type="checkbox"/> Donor eggs	<input type="checkbox"/> Other
Number of transferred embryos	1		

Sperm information

Volume (ml)	4	<input checked="" type="checkbox"/> Intended parent	<input type="checkbox"/> PESA/TESE
Sperm concentration (M/ml)	43	<input type="checkbox"/> Donor sperm	<input type="checkbox"/> Frozen
Total motility (%)	33		
Progressive motility (%)	18		
Morphology (normal, %)	6		

Embryo development

E.ID: 4	PGT: Euploid (D6)	EQ score: 8.6	Grade: 5AA	ICSI	Transferred
Day 1	Day 2	Day 3	Day 4	Day 5	Day 6
					

Disclaimer: CHLOE EQ™ is an adjunct to clinical decision-making, and the final assessment and decision must be made by a medical professional. The EQ Score reflects an embryos' potential for implantation and ranges from 0-10. A higher EQ Score represents a higher chance of implantation. CAUTION: Investigational device. Limited by Federal (or United States) law to investigational use.
